

Mold Analyzer by Micro-Pak[®]

Rapid Mold Detection

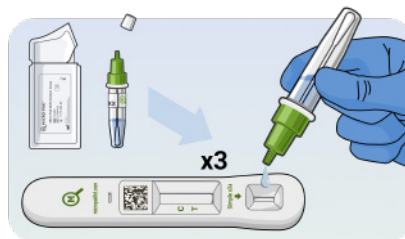

Reduce mold claims by testing raw materials, finished goods, and the factory environment for mold. Mold Analyzer is fast, accurate and affordable, generating results on-site in only 10 minutes.

Step 1

Swab

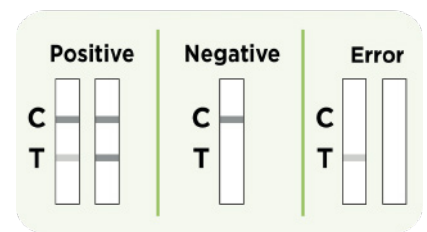

Collect your surface sample using the provided swab and insert it into the sample tube.

Step 2

Test

Apply three drops from the sample tube onto the Test Cassette.

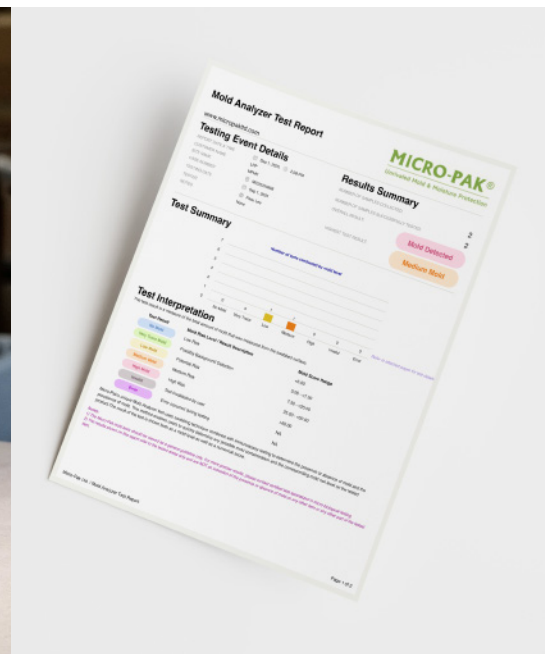

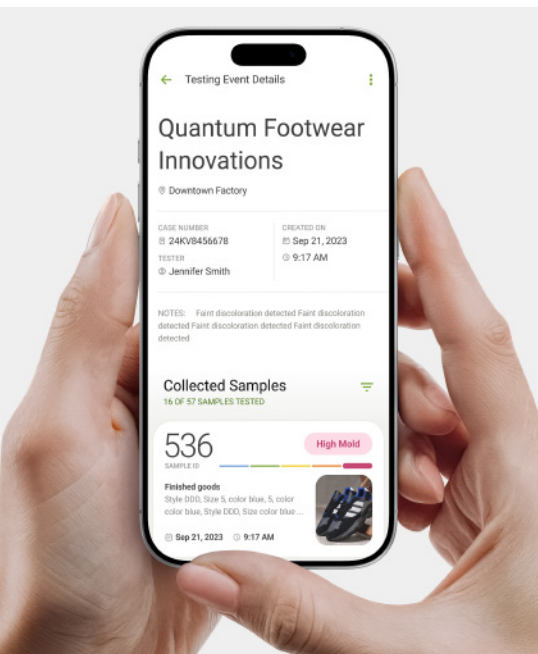

Step 3

Get Results

See clear results in minutes on the Test Cassette, or on the Mobile App when paired with the optional Reader.

Optional Reader and Mobile App deliver detailed results and digital reports.

Choose the right pack for your needs

Mold Analyzer is available in three sizes including a 25 pack for frequent or professional testing.
